

VALLURU RAVIKUMAR

Senior IT Infrastructure Manager | AI & Full-Stack Developer 📍 Hyderabad, India | 📞 +91 8008856333 |
✉️ valluru.rkchowdary@gmail.com 🔗 linkedin.com/in/ravianet/

PROFESSIONAL PROFILE

A high-impact IT Leader with 15+ years of experience in massive-scale infrastructure management, now specializing in AI application development. Unique ability to merge deep hardware/networking expertise with modern software engineering to build intelligent, brand-agnostic enterprise solutions. Currently managing infrastructure for 500+ locations and 50,000+ users.

TECHNICAL CORE COMPETENCIES

- **AI & Software Development:** Python (Django, Flask), React.js, Next.js, Node.js, Prompt Engineering, AI Anomaly Detection, WebRTC, FFmpeg.
 - **Infrastructure & Cloud:** Azure AD, Office 365 Enterprise Admin, Windows Server (2003-2019), Linux (Ubuntu, RedHat, CentOS).
 - **Networking & Security:** FortiGate/Sophos Firewalls, IPSec/SSL VPN, Cisco Meraki API, MDM, DLP, Endpoint Security (Symantec, K7).
 - **Monitoring & Systems:** Nagios, WhatsUp Gold, SQL Server, Google Maps API, Shell Scripting.
-

INDEPENDENT SOFTWARE ENGINEERING PORTFOLIO

Every project below was independently engineered by me, covering the full lifecycle from architecture to deployment.

1. Sentient Vista AI | Lead AI Developer

- **Scope:** An "AI for Good" platform merging high-precision facial recognition with mental health monitoring.
- **Function:** Integrated attendance tracking with emotional pattern analysis. Using facial biomarkers, the system detects early signs of burnout, distress, and fatigue during check-in.
- **Value:** Transforms surveillance into "Silent Protection," allowing organizations to support well-being before a crisis occurs.

2. Centralized Surveillance Ecosystem | System Architect

- **Scope:** A brand-agnostic command center for multi-brand security hardware (Hikvision, Dahua, CP Plus, Uniview).
- **Impact:** Developed a centralized CCTV surveillance portal for Sri Chaitanya Educational Institutions covering 590+ locations and 9,440+ cameras.
- **Tech:** Engineered using WebRTC for sub-second latency streaming and FFmpeg for transcoding. Integrated Google Maps API for geospatial device tracking.

3. Prozonic Manufacturing ERP | AI Integration Lead

- **Scope:** End-to-end digital transformation for uPVC and high-pressure manufacturing environments.

- **AI Layer:** Built engines for demand forecasting and smart stock health, ensuring 100% inventory availability.
- **Efficiency:** Reduced manual data entry by 95% via high-speed bulk engines and achieved sub-2-second page loads for 50+ concurrent users.

4. Cisco Meraki Network Dashboard | Developer

- **Scope:** A real-time enterprise monitoring suite for massive network environments.
- **Capacity:** Optimized to handle 1,000+ devices and 22,000+ clients simultaneously using the Meraki Dashboard API.
- **Features:** Real-time health status tracking, client connectivity history, and automatic data refresh.

5. Multi-IP Network Monitoring Tool | Python/Flask

- **Scope:** A security-focused web application for real-time network device health audits.
- **Function:** Automated ping tests and speed tests across multiple IP ranges with Excel export/import functionality.
- **Security:** Implemented secure password hashing and IP validation to prevent command injection.

6. Software License Management System | Lead Developer

- **Scope:** A Python-based enterprise tool to track software compliance and life cycles.
- **Features:** Automated email notifications for license expiry and detailed audit logs to track license assignments.

7. Enterprise Hardware Inventory Transformation

- Independently architected a brand-agnostic inventory portal to manage massive-scale infrastructure.
- Implemented deep-tracking protocols for critical hardware (CPU, RAM, Monitors) to ensure zero-leakage and total transparency across distributed sites.
- Digitized the hardware lifecycle, reducing audit time by 90% and providing instant visibility into asset health and location.

PROFESSIONAL EXPERIENCE

Varsity Educational Management Pvt. Ltd | Senior Manager, IT Infrastructure *May 2012 – Present*

- **Network Infrastructure:** Orchestrated secure Wi-Fi and core network rollouts for 200+ distributed sites.
- **Cloud Leadership:** Managing Office 365 and Azure Active Directory for 50,000+ users.
- **Team Leadership:** Directing a field engineering team of 40+ members for troubleshooting and hardware maintenance.
- **Security:** Safeguarding public IPs and managing WAN traffic via Link Load Balancing and FortiGate analytics.

St. Xavier's Educational Society | System and Network Administrator *January 2006 – May 2012*

- **Core Systems:** Administered domain servers, SQL database backups, and web/mail servers across all branches.
 - **Security:** Managed organization-wide antivirus deployment and Microsoft update server (WSUS) monitoring.
-

EDUCATION & CERTIFICATIONS

- **Bachelor of Engineering (B.E.) – Thiruvalluvar University**
- **MCSE (Microsoft Certified System Engineer)**
- **Sophos Certified Engineer**
- **Training: Linux Administration, Customer Service Excellence.**
